**Versification:** sometimes there are variations in the way different Bible translations or versions label verses. All verse identifications are man made and not considered "God inspired." A person should suspect versifications differences when they find a verse saying something totally different than it should have. One should first make sure they are in the correct place. Then one should investigate the surrounding verses to find the verse of interest. It may be identified differently but should say the same thing and be in the same order among other verses.

### EXAMPLES OF VERSIFICATIONS
